# Lawler's Gladioli Bulbs

## 1923 - 1924

Plant Gladioli bulbs from February to June for a succession of bloom. Any good garden soil (sandy preferred), with good drainage. Plant six inches apart and three inches deep. Do not let bulbs touch fresh manure. Cultivation, fertilizing after planting, and plenty of water pays well. Cut as soon as color appears in the bud and open in water in the house. Plant masses of one color. Avoid mixtures.
